

# Oakville Business Youth

In conjunction with :

The Halton Climate Collective

## Who are We?

We are two students that care about the environment, and we wanted to make a difference!

A watercolor illustration of a wind farm. The scene is dominated by a large wind turbine in the foreground on the left, with several others receding into the distance. The sky is filled with soft, blended colors of blue, orange, and yellow, suggesting a sunrise or sunset. The ground is depicted with various shades of green and blue, representing grass and shadows. The overall style is artistic and painterly.

“

*If we don't take action now,  
it will be too late!*

# What's our mission?

Our mission is to promote and encourage environmental stewardship by assisting local businesses to take climate action.

## How are we becoming environmentally friendly?

- Sustainable produce
- Sustainable energy
- Sustainable cutlery
- Waste management

What's next?

The sky's the limit!

Our challenge was:  
finding the economic &  
environmental balance

Our project prioritizes the need to adopt Practices that are Economically and Environmentally Profitable.

For Example:

LED lights save the average homeowner just under \$10 per month.

Total success!

## *Let's Look at Some Ideas for Sustainable Cutlery*

**Reusable Containers**

**Eco Cleaning Cloth**

**Produce Saver**

**Bamboo Plates**

**Ceramic Compost Keeper**

**Reusable Straws**

## The process is simple

We consult and create an implementation plan

With our help they seamlessly integrate the plan

They reap the rewards of being a climate friendly business

# What Did We Learn?

Impossible becomes Possible!

Young Voices are Louder than we Think!

We've Inherited the Climate Crisis!

Persistence is Key!

# What Inspired Us?

Take a look for yourself...

There is Hope!
